

Learn to deploy your ISV or internal app in our Teams Application Workshop

As the hub for teamwork, Microsoft Teams is designed to help organizations improve collaboration and increase efficiency by automating key business processes. With the **Teams Application Workshop**, Henson Group will work with you to identify ways to deploy your application or solution within the Microsoft Teams platform.

See what's possible

Learn the basics of building apps inside of Teams to grow revenues and usage. Our consultants will walk you through the art of the possible, working with you to identify and prioritize key business scenarios and architect your Teams application approach. During the workshop, we'll show how opportunities to customize and extend your Teams workspace using Power Apps/Automate and Virtual Agents. Then, Henson Group will design a plan to build and integration you custom apps into Team and the Teams App Store.

Realize better business results with improved automation

Drive business results through scenarios for increased productivity

Accelerate outcomes with ready-to-use apps, plug and play accelerators, and solution options

Enable app governance through guidance on governing Teams apps using policies and controls

Why Henson Group?

With extensive solution development experience, Henson Group can help you develop a Teams application approach and architecture. We will work with you to understand your apps and customer usage to identify opportunities to help you achieve adoption and increase revenues. With industry and technology experience, you can count on us as your trusted partner in your transformation journey.

We'll work with you to:

Identify and prioritize key use case scenarios

Define the best application development approach for Teams integration and adoption

Provide an application implementation plan and positioning within the Microsoft Teams Store
